FIG. 3

The Color Output Users Need, Even outside of the Office

Fusing Canon's digital imaging technology with networking technology turns any business service center or print shop into a sophisticated imaging station providing high-quality printouts whenever and wherever they are needed. Facilities such as these can handle even the most involved printing needs. The service center where you place the order can supply diverse web and pictorial data, can automatically bind magazines and catalogs, and can provide the document processing that you need for work.

In short, any service center prints and binds anything--any time and any way that you want.
